## OBJECTIVE

Using PHP for backend development and ensuring the project design is based on in-depth research. Developing a mobile application using Dart that utilizes an open-source API to display product information, including prices and reviews.

## SKILLS AND ABILITIES

- **Programming Languages:** Proficient in **PHP** (backend development) and **Dart** (mobile application development).
- **Web Development:** Experienced in **HTML, CSS, JavaScript**, and Framework for dynamic and interactive web applications.
- **Mobile App Development:** Skilled in developing **Dart-based** applications using open-source APIs to display product information, including prices and reviews.

## EXPERIENCE

### Academic & Collaborative Projects

Waste Bank Website Development

Collaborated with a Lecturer from Telkom University Purwokerto | PHP

- Developed a **waste bank management website** using **PHP** to facilitate waste collection, tracking, and user transactions.
- Implemented features for **user registration, waste category management, and transaction history tracking**.
- Collaborated with a university lecturer to enhance the system's usability and performance.

## EDUCATION

**SMA Negeri 1 Bojong Kabupaten Pekalongan**, 2019 – 2022

**Telkom University Purwokerto** – *Bachelor's Degree in Software Engineering*  
2022 – Present (or Ongoing)

## COMMUNICATION

- Effectively presented and explained technical concepts during university projects and collaborations.
- Successfully communicated and collaborated with a lecturer from **Telkom University Purwokerto** on a **waste bank website project** using PHP.
